Ms. Teresa Masotti
Ontario Sales Manager
OnePower
243 Queen Street North
Hamilton, ON L8R 3N6

Dear Ms. Masotti,

On behalf of the NYS Emergency Management Office and all our participating partner agencies, I want to thank you, and the entire OnePower staff for providing the enlightening presentation and product demonstration last week.

All of the OnePower products that you demonstrated for us have a definite place, and could fill a measurable need in the response to any number of potential incidents that can occur in New York. Of particular interest to us was the ability to equip the pods with individual slide-in modules to fill the specific need. The HVAC, water purifying, and water packaging capabilities that you demonstrated are response capabilities, often in short supply, that we are often called on to provide or support. While not as often requested, the air compressor, rescue tool, and plasma cutting capabilities would also be beneficial in some situations.

My understanding is that OnePower has initiated to process to become a "contract State-bid vendor" in the NYS Purchasing System. This will allow SEMO, and any other municipal entities in New York State to more quickly and efficiently access your products when needed. If there is anything that SEMO can do to assist in this process, please contact me.

Thank you again, for the outstanding presentation and product demonstration.

Very truly yours,

Richard A. French
Chief of Response
